## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

3. Claim 1 is rejected under 35 U.S.C. 102(a) as being anticipated by AAP (Applicant's Admitted Prior art).

The AAP (specification page 1, line 22-page 2, line 10) teaches a method for presenting information (SCH bursts) to a mobile station that is transmitted during a common idle frame that contains a set of time slots (GSM standard), comprising arranging individual transmissions (from neighbor base stations) such that all pertinent information for a mobile station is transmitted within the time slots of the common idle frame, without regard for which traffic time slot the mobile station is assigned, i.e., the SCH bursts from the neighbor base stations have no indication regarding for which traffic time slot the mobile station is assigned.

### ***Allowable Subject Matter***

4. Claims 2-7 are allowed.
